Stories from New Jersey Diners – Monuments to Community/A History of Diners in New Jersey --

Friendly, familiar beacons on the Garden State's highways, byways and downtown business districts, diners play an important role in New Jersey's history and house generational memories. More than just roadside attractions, diners are a vibrant part of the state's culture, spirit, commerce and mythology. Along with tales of noteworthy diners of the past and present, Michael Gabriele pays tribute to New Jersey as the diner manufacturing capital of the world during the 20th century. The Garden State was the "factory" that built thousands of diners—the streamlined, stainless-steel gems that are admired around the world and recognized as iconic examples of American industrial design.

Diners capture the "untold" stories that have shaped lives, families, careers, businesses, and communities. Many tales are snapshots of the immigrant experience—people who have traveled to New Jersey from far-away countries to gain a foothold as American citizens.

"Education Through Philately" - For thirty-five years I have been using postage stamps to teach about America's history. Many years ago, I started "Education Thru Philately, Inc." I go into schools, libraries, and service organizations to talk about stamp collecting and how it relates to America's history. I have written 16 books using stamps to illustrate my books. They range from Columbus to WWII. My latest book is about the bicentennial of Abraham Lincoln's birth and the 100th anniversary of the founding to the NAACP.

“Living the Dream at Craftsman Farms: Gustav Stickley’s “Garden of Eden” in New Jersey” -

In 1910, at the height of his career, Gustav Stickley, designer and visionary leader of the American Arts and Crafts Movement, moved with his family to Craftsman Farms in Morris Plains, New Jersey. For Stickley, this picturesque, fully-functioning, 650-acre farm represented the culmination of his artistic and philosophical vision. He described The Farms as his “Garden of Eden” and the realization of dreams he’d had since childhood. Sadly, Stickley’s time at The Farms was limited to seven years, but happily, his vision for the site remains in evidence today. In her lecture, Vonda Givens, the director of education at The Stickley Museum at Craftsman Farms, speaks about Gustav Stickley’s life and work, and how Craftsman Farms, now a National Historic Landmark and one of the most significant sites of the American Arts and Crafts Movement, came to be the embodiment of Stickley’s ideas. She talks about the past, present and future of Craftsman Farms, discussing how this beautiful setting moved from idealized residence, to unrecognized treasure, to beloved historic site in its 100-year history.

Vonda K. Givens, Executive Director, The Stickley Museum at Craftsman Farms, 2352 Rt. 10-West, Morris Plains, NJ 07950; 973-540-0311; www.stickleymuseum.org

A W.A.S.P. Takes Wing: The Women Airforce Service Pilots of World War II -- During World War II, more than one thousand women volunteers completed the WASP military pilot training program. They endured terrible Texas weather, snakes, spiders and scorpions, as well as the hostility of some male instructors. Graduating WASPs piloted every kind of military aircraft, tested new and overhauled airplanes (some with defective parts or dangerous reputations), delivered more than 12,000 planes, and flew over 60,000,000 miles (sometimes towing targets that soldiers shot at with live ammunition!) Thirty-eight of them died serving their country. Then they were told that men needed their jobs, and they were dismissed and forgotten.

Carol Simon Levin tells the story of the amazing WASPs through the eyes of Ann Baumgartner Carl, the Jersey girl who trained as a WASP, became the only American woman to test-fly experimental planes during the war, and the first woman in the world to fly a jet airplane!

Thomas Mundy Peterson, from Perth Amboy, first black voter in the United States. On March 31, 1870, the man we know as Thomas Mundy Peterson of Perth Amboy, New Jersey, became the first African American to vote under the auspices of the Fifteenth Amendment to the Constitution of the United States. If you've heard of Thomas Mundy Peterson before, this is probably the extent of what you know about him. Certainly, it was all I knew when I first encountered him. But, being the unabashed history geek that I am - particularly New Jersey history - I wanted to know more.

What I discovered was how it took a truly remarkable convergence of circumstances to make that moment possible. I also learned how, as much as this was the story of one man, it was also the story of a community who took a small, imperfect but historic step in the evolution of how we deal with race in this country. I also discovered I wasn't the only "Peterson scholar."

In my new presentation, "To Cast a Freedman's Vote: How a handyman from Perth Amboy made Civil Rights history," I summarize the research done to date about Peterson and his historic vote. I debuted it, appropriately enough, at the Perth Amboy Ferry Slip Museum, within walking distance of where Peterson lived and where he cast his vote. It was very well-received and in recognition of Black History Month, I am announcing that I am available to give this presentation for history and civic organizations.

American Historical Theatre Presents Sojourner Truth: "Ain't I a Woman?"

Isabella Baumfree changed her name to Sojourner Truth and walked through Long Island and Connecticut, preaching "God's truth and plan for salvation." After months of travel, she arrived in Northampton, Massachusetts, and joined "The Northampton Association of Education and Industry", a utopian community where she met and worked with abolitionists such as William Lloyd Garrison and Frederick Douglass. www.AHTheatre.org Also available through the New Jersey Council for the Humanities

American Historical Theatre Presents Hercules: Culinary Artist – Free at Last

Flamboyant, and larger than life, Hercules was George Washington's talented chef in Mount Vernon, New York and in Philadelphia. As gifted as any chef in the colonies, Hercules was a popular and prominent figure inside and outside of the Washington household. Because of his special talents, this slave was afforded many privileges: keeping the profits from the sale of left-over food, being able to walk around freely with his gold-handled cane, and the opportunity to dress extravagantly for his station. Hercules worked the system and succeeded in living life as much on his own terms as possible. One day, he left the Washingtons, never to be found; once master of the kitchen, now master of his own destiny! www.AHTheatre.org

American Historical Theatre Presents Oney Judge: Runaway Slave

A dower slave owned by the estate of Martha Washington's first husband, Oney Judge, worked for President and Lady Washington, first in the New York City capital, and later in Philadelphia. Though Pennsylvania Law gave slaves the legal power to free themselves after six months in residence, Washington's position was that Pennsylvania was only temporarily the capital, so the law was not applicable to his household. When Oney learned that Martha Washington intended to offer her as a wedding present to her granddaughter, and that her transfer back to the south was imminent, Oney made a plan of escape. She traveled north to New Hampshire and lived as a fugitive for 52 years. This strong, capable woman never regretted her actions, and is quoted as saying, "No, I am free and have, I trust, been made a child of God by the means." www.AHTheatre.org

Harriet Tubman: The Road to Freedom

Born Araminta Ross, Harriet Tubman lived as a slave on a Maryland plantation. Frequently threatened, beaten, whipped, and starved, Ms. Tubman's indomitable spirit could not be broken. Receiving an accidental head wound during an overseer's fit of wrath; Harriet Tubman suffered from seizures for the rest of her life. But even this daunting physical obstacle could not keep her from her freeing herself and freeing others from slavery. A Union spy during the Civil War as well as a nurse, Ms. Tubman directed her considerable energies towards humanitarian causes that included women's suffrage after the war. www.AHTheatre.org

Colonial America

Take the time to greet **Poor Palatine Patriot Christopher**. George Philhower-Apgar shall portray a Jersey German Valley 18th-century patriot farmer from the village of Fairmount, Hunterdon County in 1715. George will provide a timeline on how these Palatines (aka Germans) emigrated from the Old World Rhine River area to the colony of New Jersey, first arriving at Port Nutten Island, County of New York.

Stories from the Mayflower: What Were They Thinking?

The story of the Mayflower and its passengers is far more interesting and complex than what we were taught in school. Do you know about the 4-year-old child who was sent aboard as an indentured servant or the “Strangers” who outnumbered the Pilgrims? Have you heard about the boy who almost blew up the Mayflower or the ship within the ship?

Enjoy these and other fascinating stories that will change the way you think about the Pilgrims. In person or virtual.

The Native Americans Who Saved the Pilgrims

This is not a simple story. These were not simple men. The Native Americans who helped the Pilgrims survive their first desperate year in Plymouth lived in a complex, rapidly changing world.

Come and hear the fascinating stories of Squanto, Massasoit, and Samoset. Learn who they were, what they did, and why they did it. It is a much more interesting story than the one you learned in school. In person or virtual.

Colonial Taverns of New Jersey – Libations, Liberty, and Revolution -- New Jersey was the “Crossroads of the American Revolution,” and as battles raged, colonial taverns formed the social network that held the state together. A haven for Patriots and Loyalists alike, colonial taverns were the “seedbeds” for the Revolution, strongholds for political activities, beacons for travelers, and venues for entertainment, merriment, business conversations, and libations.

Colonial taverns were the places where the voices of history took shape and served as recruitment stations for colonial militias. George Washington often used taverns as headquarters, where he drafted his many letters and planned strategy with his generals. Colonial taverns were located along well-traveled routes, due to the demand for stagecoach travel between New York and Philadelphia—transporting people and commercial goods.

Each day in the Garden State, we literally walk along the Crossroads of the Revolution in the footprints of our forbearers—a legacy that lies just below the surface of our everyday lives. The ghosts that linger on these byways sustain our state’s collective heritage and living history.

Entertainment

"Carousels: Then and Now" -- Remember the thrill of riding a carousel with the horse bobbing up and the sound of the Wurlitzer Band or steam organ (calliope), or maybe if you are old enough catching the brass ring. There was a time when 5,000 carousels dotted the landscape of this country, today 150 remain. Where did they go? How did Coney Island go from 25 carousels to just one today? Who are the masters of this art form? What is the state of carousel production today?

This presentation by Mario Medici will take you from the earliest days of carousels until the present and attempt to answer these questions and more. Amateur photographer, art history enthusiast, and avid researcher, Mario Medici will take you on this fascinating journey.

American Historical Theatre: Lewis and Clark: The Corps of Discovery

William Clark regales audiences with stories of calm bravery in the face of danger, determination in the face of overwhelming odds, and good, old-fashioned adventure. The Corps of Discovery Expedition, which he led with fellow explorer Meriwether Lewis, and was commissioned by President Thomas Jefferson, was intended for commercial and scientific discoveries. Though the commercial goal of finding a passage by water across the continent from Asia was not successful, this duo of distinctly different personalities made the first transcontinental voyage and some tremendous scientific discoveries in biology and geography. www.AHTheatre.org

“The Lure and Lore of Liquor: Tavern Beverages of the American Revolution”

Many people know that our Revolution was fomented in the famous taverns of Colonial America: City Tavern of Philadelphia, Boston’s Green Dragon, and the Raleigh in Williamsburg. But other than politics, what was fueling the debates between the Sons of Liberty or the Virginia burgesses? Join historian and mixologist (yes, indeed) David Emerson in a lively exploration of Colonial drinking customs. The talk will include discussion of the various types of beverages available to the 18th-century tavern tippler, how they were made, and even some recipes that you can try on your own (if you dare). Discover our forefathers’ alternative to the modern mohito and martini, and what Ben Franklin considered “The proof of God’s love.”

"Envisioning New Jersey: A New (Visual) History of the Garden State"— The Garden State, the Crossroads of the Revolution, the Traitor State, the Suburban State, The Sopranos State, the Sandy State, the home of the Toxic Avenger: what is New Jersey? In this illustrated presentation, Richard Veit will speak about his new book, which he co-authored with historian Maxine Lurie, *Envisioning New Jersey*. In a world where attention spans are sometimes as brief as Instagram photos and Twitter tweets, what role is there for authors and books interested in expanding our understanding of the past?

This presentation discusses the inspiration behind *Envisioning New Jersey* and uses a series of carefully selected case studies to illustrate how studying the state's history remains relevant and indeed critical for modern residents and neighbors. It also discusses the process of moving from author to curator as we worked to select images: paintings, drawings, maps, portraits, and artifacts that revealed the state's history in new and intriguing ways. We conclude, as historian John Cunningham did decades ago, that New Jersey is indeed a microcosm for America, although we see this somewhat differently than he did.

Crossing under the Hudson -- The Lincoln and Holland Tunnels are key links in the transportation infrastructure of New York and New Jersey. What comes to mind when we think of these tunnels? Traffic. Honk. Beep. Beep. Exhaust. Moving beyond that view, Gillespie takes a fresh look at their planning and construction. With a lively and entertaining approach, Gillespie explores these two monumental works of civil engineering and the public that embraced them. He describes and analyzes the building of the tunnels, introduces listeners to the people who worked there—then and now—and places the structures into a meaningful cultural context with the music, art, literature, and motion pictures that these tunnels, engineering marvels of their day, have inspired over the years. Angus Kress Gillespie, Ph.D. Professor of American Studies, Rutgers University.

Speaker requests that a microphone be made available. Program only available in Mercer, Middlesex, Monmouth, Somerset, and Union counties.

Franklin Courter an Appreciation of Lincoln Portraiture - Cedar Grove artist Franklin Courter (1854-1947) lived for about 30 years in Michigan toward the end of the 19th century. His most famous painting depicts the October 1864 meeting between the civil rights and suffrage crusader Sojourner Truth and President Lincoln at the White House. "I knew her. She lived about 3 blocks from my home there in Battle Creek. She related to me the circumstances explaining how it happened that Lincoln showed the Bible. She told me about it in that unusual voice of hers... so marvelously deep and smooth and powerful." -- Franklin Courter on Sojourner Truth.

"President WHO?!!!" -- For most of us celebrating Presidents' Day, we think of Washington, Lincoln, Roosevelt and Jefferson, the greats, but how about the ones we just can't describe, Benjamin Harrison, *the hole in the doughnut*, the president in the middle of the term of Grover Cleveland, *His Accidency*, John Tyler, the first president not be elected as the president, Chester A. Arthur, who never even knew he was nominated for vice-president until they told him, and, of course, the ever popular Millard Fillmore -*Who?* Some additional *Who?* are presented.

Bridge Builder in Petticoats: Emily Warren Roebling and the Brooklyn Bridge -- Many books and films have featured the Brooklyn Bridge and millions of people have crossed it. Built between 1869 and 1883, without modern machines or even electric light, it was the one of the most amazing technological achievements of its time. Yet few people know that a woman helped supervise much of its construction. After her husband became bedridden, Emily Roebling became his liaison to the project – eventually communicating with the engineers and suppliers so well that it was rumored that she had become the Chief Engineer herself! Later she helped design the family mansion in Trenton, studied law, organized relief for returning troops from the Spanish American War, attended the

coronation of the Tsar of Russia and even took tea with Queen Victoria. At her death, she was called “the most famous woman in New Jersey” and “one of the most noted women in the country,” yet today almost no one knows her name!

A W.A.S.P. Takes Wing: The Women Airforce Service Pilots of World War II -- During World War II, more than one thousand women volunteers completed the WASP military pilot training program. They endured terrible Texas weather, snakes, spiders and scorpions, as well as the hostility of some male instructors. Graduating WASPs piloted every kind of military aircraft, tested new and overhauled airplanes (some with defective parts or dangerous reputations), delivered more than 12,000 planes, and flew over 60,000,000 miles (sometimes towing targets that soldiers shot at with live ammunition!) Thirty-eight of them died serving their country. Then they were told that men needed their jobs, and they were dismissed and forgotten.

Carol Simon Levin tells the story of the amazing WASPs through the eyes of Ann Baumgartner Carl, the Jersey girl who trained as a WASP, became the only American woman to test-fly experimental planes during the war, and the first woman in the world to fly a jet airplane!

Photographs and reading from *Josephine: from Washington Working Girl to Fisherman's Wife. A Memoir 1917-1959.* This memoir is based on the diaries and letters of a professional woman ahead of her time. In 1918, Josephine left a job on the county daily in Michigan to go to Washington, DC to work for the War Department – they were called Government Girls back then. When the war ended, she got a job as a secretary and then editor to Frank G. Carpenter, the country’s first travel writer and author of books about his world travels. Her diaries and the photos I show paint a picture of Washington, DC at war, almost 100 years ago.

In the 1920s Josephine went to work for Lowell Thomas as a researcher and ghostwriter, traveling throughout Europe in the late 1920s. During this period, she had a harrowing first airplane flight across the English Channel and just before the stock market crashed in 1929, cruised the Caribbean on an outrageously extravagant trip aboard Count Felix von Luckner’s four-masted windjammer. She wrote it all down. Photos and readings from the explored diary and letters chronicle early 20th-century optimism and the emerging professional woman. That is Part 1. Josephine married in 1931 and attempted to combine work with motherhood. Part 2 brings the couple to New Jersey in 1933 where they settle on sparsely populated Long Beach Island, Jo’s husband’s former summer place. His family import/export business on Wall St. failed in the Great Depression, and she tried to make a living by writing. This part documents finding happiness in a simple life at home, life at the shore during the 1930s, through two hurricanes and World War II, Jo’s renewed interest in writing when a new weekly newspaper begins, and her death from cancer in 1959.

Holidays

Legends and Lore of the Winter Holidays -- Join Interpreters Stacy Roth and Dave Emerson as they conjure the ghosts of Christmases past to present the “**Legends and Lore of the Winter Holidays.**” Hear the traditional songs and stories, learn of archaic customs and carols and discover how the Victorians in general—and three authors in particular—revitalized and reinvented our favorite holiday. A veritable cornucopia of holiday treats certain to delight the entire family.

Roth is an interpreter, museum educator, historian, and information specialist who has performed and presented for museums, libraries, schools, civic organizations, and festivals throughout the area. Emerson has worked at living history museums for over 25 years as an independent storyteller, teaching history through the eyes of a "person of the past." He is a veteran of Colonial Williamsburg, Plimoth Plantation, Morristown National Historical Park, and the Old Barracks Museum. They will appear in period costumes.

"David Maccaffrey, the Shannachie of Glendunbunn Ballybegg: Spooky Tales" -- Did you know the Celts invented Halloween? Long before Christianity made it to Ireland's misty shores, the native Celtic people celebrated the 31st of October as the eve of Samhain, a time when the boundaries of our world and the 'Otherworld' are at their thinnest and all manner of spirits, spectres, fairies and fell creatures are free to roam the mortal realm. Join storyteller David MacCaffrey, the "Shannachie of Glendunbun Ballybegg" as he tells traditional and modern Irish tales of terror. Drawing on the ancient folkways and legends of the people who practically invented horror his stories present a macabre menagerie of ghosts and ghouls, devils and demons, banshees and beasties and things that go bump in the night. A perfect way to start our favorite haunted holiday.

The IWW in the Great Paterson Silk Strike – A major chapter in the history of organized labor was written in Paterson in 1916. What was the four-loom system? Why Paterson? How and why did the Industrial Workers of the World become involved? Would the tactics used successfully in the mines and lumber camps work in the mills? Could a polyglot collection of Unions put aside their individual goals for a collective one? Would workers in New York support their fellowmen in New Jersey? What methods were used to break the strike? Could the solidarity of a multinational workforce overcome the power of capital? What were the effects on the city—then and now? Was this a victory or a defeat of organized labor?

The Triangle Tragedy, March 25, 1911 - The Triangle Shirtwaist Company, occupying the top three floors of a ten-story building in New York City, was consumed by fire. One hundred and forty-seven people, mostly women and young girls working in sweatshop conditions, lost their lives. Approximately 50 died as they leapt from windows to the street; the others were burned or trampled to death as they desperately attempted to escape through stairway exits locked as a precaution against "the interruption of work". On 11 April the company's owners were indicted for manslaughter. Would justice prevail? “The Garden State: Where Ideas Grow” – Based on her book, *A History of Inventing in New Jersey: From Thomas Edison to the Ice Cream Cone*, this program by Linda J. Barth explores groundbreaking, useful, fun, and even silly inventions and their New Jersey roots.

Many people are familiar with Edison's “invention factory” in Menlo Park, where he patented the phonograph, the light bulb, and many more innovations. Yet many other ideas have grown in the Garden State, too—New Jerseyans brought sound and music to movies and built the very first drive-in theater. In addition to the first cultivated blueberry, tasty treats like ice cream cones and M&M's® are also Jersey natives. Iconic aspects of American life, like Bubble Wrap®, the boardwalk, the Band-Aid®, and even professional baseball itself started in New Jersey. Life would be a lot harder without the vacuum cleaner, plastic, and air-conditioning, and many other important advances in medicine and surgery were developed here.

New Jersey Originals: Technological Marvels, Odd Inventions, Trailblazing Characters, and More

What makes New Jersey so special? In addition to culture, wonderful suburban towns, a high standard of living, strong public schools, a mild climate, mountains and beaches, we must add one more: innovation.

In addition to the creations of Bell Labs and Thomas Edison, New Jersey has innovators and inventors galore. In the first inventions program, based on *A History of Inventing in New Jersey: From Thomas Edison to the Ice Cream Cone*, we detailed our state's many inventions in science, communications, food, medicine, sports, and transportation.

In this new program, you can learn about more of the inventions of Bell Labs and Edison, in addition to other valuable, brilliant, and quirky creations. The work of our soldiers at Fort Monmouth

and Camp Evans—including radar and night vision goggles—helped the United States win World War II. Cook College at Rutgers has produced important, often disease-resistant, vegetables and flowers. Among the edible inventions are pork roll, M&M's, and the famous Campbell's green bean casserole. Quirky firsts include Lucy the Elephant and the Francis life car. And just for fun, I've added some famous and not-so-famous New Jerseyans.

So, kick off your shoes, pour a cup of tea, and join us on a Jersey journey of innovation.

"Celebrating the Jersey Shore" - PowerPoint slideshow and readings from *Shore Chronicles: Diaries and Traveler's Tales from the Jersey Shore 1764-1955* and *Island Album: Photographs and Memories of Long Beach Island*. Travel with me "down the shore" as I illustrate the shore experience over the decades. Here are stories and pictures of sailing and fishing, of treks by horse, stagecoach, train, and car, of beach camping, lifeguards, and coastal rescue, of bathing beauties in rented woolen suits and flappers, of violent storms and the endless struggle to resist a hungry sea. Writing by such well-known figures as John J. Audubon, Walt Whitman, Robert Louis Stevenson, Stephen Crane, and Sir Arthur Conan Doyle is included. But, perhaps most interesting are the selections from private journals, letters, and diaries from unknowns vacationing or visiting the shore.

"New Jersey Shipwrecks" - A slide show and reading from the dramatic *New Jersey Shipwrecks: 350 Years in the Graveyard of the Atlantic* takes us on a gripping voyage through the "Graveyard of the Atlantic" -- a name bestowed upon the state's treacherous shoals and inlets. Before this coastline became a summer playground of second homes and resort beaches, it was a wild frontier of uninhabited and shifting sandbars. From the days of sail to steam and oil, ships (and even submarines) have been drawn to this coast. And for thousands of vessels, it became their final resting place. I explore this history, along with the development of the U.S. Coast Guard from its 1848 origin as the Lifesaving Service, through illustrations, photographs, and readings from the

harrowing memories of survivors and observers. I bring my audience into the storm-tossed surf. We are caught in the swirling wreck-filled waters, and fires of maritime disasters like the Morro Castle, and come away with a sense of shared survival as well as respect for the brave heroes and lost souls of this book.

“Great Storms of the Jersey Shore” - A dramatic history of the major coastal storms that have hit the Jersey Shore throughout recorded history. This PowerPoint slide show is adapted from the book, which is illustrated with nearly 200 photographs, engravings, and maps. We have chosen an exciting selection to fit into the one-hour format and have added photographs gathered in the years since the book was first published in 1993. A new 2019 edition of this popular book has now been updated by Scott Mazella, author of *Surviving Sandy*, and will include new weather information, storms, and especially Super Storm Sandy, and how it affected the Jersey shore. Scott and I now do either a joint presentation or he does it alone. This presentation is an opportunity to appreciate the horror and beauty of nature at its most powerful. It covers the whole shoreline but can be altered to emphasize the northern or southern shore.

American Historical Theatre: Governor Livingston, I Presume

Born in New York (1723) Livingston, a graduate of Yale, went into law, but after years in New York politics, he and his family moved to Elizabethtown where they built an estate (Liberty Hall). Returned to politics by the Revolutionary War, he was a member of the first and second Continental Congresses. In 1776, he left Congress to command the New Jersey militia, and later that year he was elected the first governor of our state. Livingston spurred New Jersey's rapid ratification of the Constitution, conducted agricultural experiments, and was also active in the anti-slavery movement. www.AHTheatre.org. George Washington and His Spies -- Anne and Ridley Enslow perform a musical presentation about spies during the American Revolution. This show covers espionage on both sides of the war, from the Revolution's earliest days until its dramatic conclusion. This will be a fascinating, one-hour

presentation (vocal, violin and hammered dulcimer) interspersed with historical commentary, an interesting take on the 250th anniversary of the American Revolution.

Ridley Enslow, 201-222-7756, menslow@aol.com. Web site: Enslowmusic.com

Lafayette: Music for the Marquis -- This one-hour performance by Anne and Ridley Enslow alternates narrative with vocal music, violin, and hammered dulcimer. It follows Lafayette's life, from his childhood in the court of France to his service in the American Revolution. The post-war years were not kind to Lafayette. He tried to bring American ideals to the nascent French Revolution and ended up unleashing furious mobs. In 1824 and 1825 Lafayette was invited back to this country for a triumphal tour. 2024 and 2025 years are the 200th anniversary of his visit to the U.S.

Mrs. Bennett Follows the Army

Learn about life as a woman who followed Washington's Continental Army during the Revolutionary War. Wives, daughters, mothers, and single women followed their men on long marches and through cold and hungry conditions. Many had children with them. They worked as laundresses, cooks, and nurses. And, yes, a few were prostitutes.

Spend an hour with Mrs. Bennett and hear about life in camp, on the march, and during skirmishes and battles. Hear why they joined the Army, how they were treated, and why they stayed.

Performed in person only and in period dress.

“Over Here, Molly Pitcher”: Stories of a Woman of the Army in the American Revolution" This interpretive storytelling program relates the legend of “Molly Pitcher” (Mary Hays McCauley), the heroine of the 1778 Battle of Monmouth Courthouse – and explores the daily lives of the “women of the army” who followed their husbands to war during the American Revolution. Molly reminisces about the days when she accompanied her husband through summer battles and winter encampments from Valley Forge to Monmouth to Morristown. Relating her tales of firing a cannon in the heat of battle to trudging “behind the baggage,” she provides a glimpse into what it was like to be a “camp follower” in the days when American independence was a dream rather a certainty. Participatory artillery drill, too! Adult and elementary school versions.

Bloody Footprints in the Snow: The Christmas Miracle at Trenton, 1776 - How close to capitulation was Washington's Army? His depleted "army" was down to 4,000 half-starved, unpaid citizen soldiers (from the 24,000 only six months ago). Washington's desperately bold plan to attack the professional Hessian regulars must succeed or; the new democracy called "The United States of America" would collapse in weeks. Following a night river crossing of the ice flowed Delaware, this army advanced on Trenton. Many lacked bayonets, shoes and even dry powder. How could they succeed against these "Elite" mercenaries from Europe? Who were these Hessians anyway? Why were they in Trenton? How did a staving, beaten rabble rout these professional soldiers? Who were Glover, Ewing, and Cadwalader? What were the results of this seemingly insignificant conflict along the Delaware? This is real story of the "Best American Christmas" ever ...1776.

Revolutionary War lectures by Joel Farkas, joelfarkas@aol.com

Email me (joelfarkas@aol.com) or call me (973-454-3832) for detailed information about any of my lectures, or to book any of my lectures. Thank you.

L1-GEORGE WASHINGTON, NEW JERSEY, AND THE REVOLUTIONARY WAR -- The Man...The State...The War. A Revolutionary Trifecta!. (General Washington ORDERS YOU to book this lecture)

L2-AFTER THE REVOLUTIONARY WAR -- We protested...We fought...We won...Let our country begin! This lecture includes Creating our constitution. Our first presidents. The Duel. The Traitor. The French Revolution. Napoleon. The War of 1812. And a whole lot more.

L3-"REMEMBER THE LADIES": WOMEN IN THE TIME OF THE AMERICAN REVOLUTION -- How men viewed women. The expectations of women. The challenges of just being a woman. Education, medicine, health, childbirth. Our country's First Ladies. Our country's First Mother. This could happen to you, (as it did to me), if you forget "EQUAL COMMAND." Let's listen to Abigail (Adams) and "REMEMBER THE LADIES"

L4-REMEMBERING THE AMERICAN REVOLUTION -- Mark Twain once said, "NEVER LET THE TRUTH GET IN THE WAY OF A GOOD STORY." How do you remember the founding of our country, The "truth"? A "good story"? Anything? In this lecture we'll talk about the poem (Paul Revere's Ride), the painting (Washington Crossing The Delaware), Bunker Hill, The Declaration of Independence, George Washington's false teeth, and a whole lot more. GET READY TO HAVE SOME FUN!

L5-GEORGE WASHINGTON and MORRISTOWN, NJ...PERFECT TOGETHER -- Finding the past in the present. A "visual" walking tour connecting The Revolutionary War to Morristown, NJ to George Washington. What happened during George Washington's two winter encampments in Morristown during the Revolutionary War. The Ford Mansion. The Alexander Hamilton connection. The Marquis de Lafayette connection. The plot to kidnap George Washington. George Washington fact vs fiction. And more! **PS: A BUS TOUR is available for this lecture.**

L6-"PAINTING" THE AMERICAN REVOLUTION -- The founding of our country through the fine arts. Paintings, Poems, Portraits, Sculptures, Music, and more. Learn about the importance of the Fine Arts during The American Revolution, and how those same Fine Arts help define us as a nation today. Learn what "macaroni" really means in the song "Yankee Doodle." In fact, I'll bet you're singing that song right now for the first time in what, decades? Now that's what I call "PAINTING" POWER!

L9-THE DECLARATION OF INDEPENDENCE: AMERICA'S BIRTH CERTIFICATE -- From Magna Carta (1215) to The French and Indian War to The Declaration of Independence to The Revolutionary War to Independence to The French Revolution to Napoleon to The War of 1812 to TODAY. FASTEN YOUR SADDLES AND SEATBELTS. This is going to be quite a ride.

L23-REVOLUTIONARY ICONS: The Back Story...THE WHOLE STORY -- So, \$24 for Manhattan? So, what caused THE DUEL between ALEXANDER HAMILTON and AARON BURR? So, why did BENEDICT ARNOLD become a traitor? So, how historically accurate is the iconic painting WASHINGTON CROSSING THE DELAWARE? (Hint, not very). What are the differences? Why are there differences? So, did George Washington really have wooden false teeth? (I promise to tell you "The TEETH, The whole TEETH, And NOTHING BUT THE TEETH") You'll know the answers to the above, and a whole lot more, once you know...THE WHOLE STORY

L16-THE AMERICAN REVOLUTION IN ONE HOUR -- The founding of our country for those in a hurry. (I need to talk really fast to get everything in, so DON'T FORGET YOUR SNEAKERS!

L17-THE COMPLETE AMERICAN REVOLUTION: A 3 LECTURE SERIES -- The Road to Revolution (1753-1776) -- The Revolutionary War (1775-1783) -- After the Revolutionary War (1783-1814)

Washington Slept Here, A Lot: Washington in New Jersey

General Washington spent more time in New Jersey than any other state during the Revolutionary War. He fought here, wintered here, waited here, and sometimes just passed through. Whatever he was doing, he had to sleep somewhere. Some buildings still stand, some places are marked, some are forgotten. Join me for an armchair tour of the places where Washington slept. Military – Civil War

The Weary & Wounded: The Civil War at Liberty Hall

Discover the incredible life of Liberty Hall's own Civil War nurse, Christine Kean Griffin. Using diaries, letters, photographs, and objects in our collection, join us as we recreate Christine's harrowing journey and experience as a nurse for the US Sanitary Commission during the Battle of Fair Oaks/Seven Pines of 1862. Explore the causes of the war, the Union and Confederate responses, and how one woman from a small town in New Jersey made a large impact.

“The Thirty-third New Jersey Civil War Regiment” – The Thirty-third New Jersey Civil War regiment was formed in Newark in the summer of 1863 and lost 25% of its men to desertion before leaving New Jersey. Sent to Tennessee, the regiment effectively walked to Washington, D.C. by way of Atlanta and Savannah. The talk will focus on the story of the regiment's founding and its service in the crucial Atlanta campaign. A typical program is a half-hour talk followed by questions and discussions.

“The Story of the Battle of Franklin, Tennessee (November 30, 1864)” – The story is interwoven with *The Widow of the South*, a NY Times best-selling novel about that battle and its aftermath. It features Carrie McGavock and the cemetery she founded at her home, where almost 1500 Confederates are buried. While a novel, it is based on actual events. I am a descendant of the heroine and active in the museum that was then our family home. This presentation lasts about 30 - 40 minutes, plus questions. I would need a projector to hook up to a computer. This talk is tailored to the audience; e.g. more military for Civil War Roundtables.

“The Strong Southern Woman: Facing the Challenges of War in her own Back Yard” --

Southern women rise again to speak to modern audiences during this Power Point presentation about the lives of Southern women during the War Between the States. Enter the world of Confederate nurses and spies. Learn how Southern women expressed their patriotism while coping with food shortages and living in constant physical danger.

Smile with an Alabama housewife as she remembers the constant labor of making clothing for the soldiers. Listen to the desperate pleas of a Virginia farm wife begging for food for her children. Grieve with a Confederate nurse at the death of a very young soldier.

This presentation features the wartime experiences of twenty-two Southern women and includes photographs or portraits of thirteen of those women. Sketches from Harper’s Weekly and other photographs reveal life as it was for Southern women during the War Between the States. In period attire, Living Historian Rhonda Florian has performed this program for museums, libraries, historical societies, heritage societies, Civil War Round Tables, and other organizations across New Jersey, New York, and Pennsylvania.

Florian received her B.A. in English at Welch College in Nashville, TN and her M.F.A. in Acting at Rutgers University. She is a former high school English teacher and a former Certified Shorthand Court Reporter in the State of New Jersey. “New Jersey’s Own Civil War Characters: The Men, the Women, the Good Guys and the Bad.”

To many the focus of the Civil War is the battles and that become the turn-off, but the people themselves have a great story to tell and they should be known. Cornelia Hancock rejected as a nurse because she was too *pretty*, goes to the Gettysburg battlefield at her own expense with her own medical supplies and tends to the wounded and continues to serve throughout the war, Charles Hopkins, a driver on the underground railroad enters service, is awarded a Congressional Medal of honor and is a prisoner in Andersonville, Willie McGee awarded a Medal of Honor based upon his totally fabricated story. The program also features characters from the areas in which the talk is presented.

Rich Rosenthal is the president of the North Jersey Civil War Round Table, the largest round table in New Jersey, also served on the New Jersey Civil War 150 Committee.

The Lost Cause -- How the South Saw the Civil War

The Lost Cause was a mythology created by Confederates to justify their catastrophic defeat and establish themselves as victims of Northern aggression. It was based on dishonest and badly distorted historical claims. It is still widely believed today.

My program reveals how the South were the true aggressors who created a racist, frequently violent culture before, during and after the Civil War. It shows how Hollywood and the TV industry, contributed to the South's mythology.

This one-hour program explains it all in a clear, concise manner. This program is available May thru early December 2019. Honorarium is \$ 75.00.

A W.A.S.P. Takes Wing: The Women Airforce Service Pilots of World War II -- During World War II, more than one thousand women volunteers completed the WASP military pilot training program. They endured terrible Texas weather, snakes, spiders and scorpions, as well as the hostility of some male instructors. Graduating WASPs piloted every kind of military aircraft, tested new and overhauled airplanes (some with defective parts or dangerous reputations), delivered more than 12,000 planes, and flew over 60,000,000 miles (sometimes towing targets that soldiers shot at with live ammunition!) Thirty-eight of them died serving their country. Then they were told that men needed their jobs and they were dismissed and forgotten.

Carol Simon Levin tells the story of the amazing WASPs through the eyes of Ann Baumgartner Carl, the Jersey girl who trained as a WASP, became the only American woman to test-fly experimental planes during the war, and the first woman in the world to fly a jet airplane!

German U-boats off the Jersey shore -- I am a Philadelphia-based wreck diver and Marine Corps veteran who recently finished writing the nonfiction book "Killing Shore: The True Story of Hitler's U-boats Off the New Jersey Coast". It will be in print in early 2024, precise date TBD. My value proposition here hinges on the fact that Killing Shore is quite different from other books on this topic, in both approach & substance. The main story focuses on eleven ships sunk by U-boats along the Jersey Shore, and each chapter focuses on a different ship (I have also dived several of these wrecks.) Events are portrayed from multiple perspectives: victims, attackers, rescuers, and coastal residents. All the sinkings are linked by an overarching narrative about why the U-boats came to American waters and how they were ultimately defeated. I would also speak about how NJ eventually became the birthplace of American wreck diving due in part to the events portrayed in the book. Please accept my sincerest appreciations for reading this request.

Rhythm & Blues Vocal Harmony and Doo Wop Music are among the least documented, least respected and least understood of all the American musical art forms. Over the past 40 years we've had the pleasure of interviewing literally hundreds of vocal group singers. Many became our close friends. Tragically, many of those singers are no longer with us. The task of preserving their legacy has fallen on the select few serious researchers who had the foresight to document these artists' stories over the past several decades. Our presentations are meant to educate as well as entertain. We help our audiences learn the stories behind the songs they grew up with as well as the singers who sang those songs.

New Jersey Folk Revival Music: History & Tradition

Michael Gabriele provides a narrative on the evolution of folk revival music in New Jersey—from the days of bawdy tavern revelers and fiddle players in the 1700s; to the magical acoustic sounds heard throughout the Pine Barrens; to the advent of the “Guitar Mania” phenomenon in the mid-1800s; to monumental recordings made by Woody Guthrie, Paul Robeson, Jimmie Rodgers, the Carter Family and Cecil Sharp at the Victor studios in

Camden during the early 1900s; to the growth of music festivals throughout the state; to the pioneering efforts of contemporary acoustic musicians.

Folk songs are poetry that speaks to the quiet dignity of everyday life. New Jersey has been home to numerous milestones that have shaped the folk revival as a musical art form. The book documents the Garden State's vast contributions to this musical genre and examines the effects of folk revival music on local history and culture, as well as how it has changed lives—those on stage and those in the audience.

Nineteenth-Century Life

Dating 19th-Century Photos: Half-Day Workshop

Instructor: Gary D. Saretzky, Archivist, Educator, and Photographer

Old portrait photographs are often found without a date, but dates can be estimated fairly precisely based on the type of photograph; sitter's identity and clothing; physical characteristics of the photo, including mounting styles and mount thickness; photographer; and other factors. The workshop covers major types of 19th century photographic processes used for portraiture and when they were popular, including daguerreotype, ambrotype, ferrotype (popularly known as tintype), albumen print, collodion print, and silver gelatin print, followed by techniques for dating photographs. Participants will learn how to use a micrometer to measure mounting board thickness. Three slide presentations, with several hundred examples of the three most commonly found types of portrait photographs, will show dated cartes-de-visite, cabinet cards, and ferrotypes in chronological order to help participants learn how the look of such images and their mounts evolved between the 1850s and 1900. The presenter will also bring vintage examples and discuss how to identify and date them. After the lectures, participants will try to date original examples using the micrometer. The presenter will also display selected publications and provide a bibliography helpful for dating photographs. Participants may bring examples from their own collections for analysis and discussion.

Saretzky recently retired after more than 50 years working as an archivist, most recently as the Monmouth County Archivist (1994-2019). He taught the history of photography as an adjunct professor for 34 years at Mercer County Community College and is the author of more than 100 articles and reviews on the history of photography and photographic conservation. Saretzky's list of more than 3,000 19th century New Jersey photographers is available at saretzky.com, which also includes his lecture schedule, online photo book store, samples of his photographs, and other resources. He speaks regularly throughout New Jersey, often under the auspices of the Public Scholars Project of the New Jersey Council for the Humanities. In addition to his workshop on dating photos, he has lectures available on 19th century photographers for each of New Jersey's 21 counties; 19th Century New Jersey Women Photographers; New Jersey's Civil War Era Photographers; and other topics listed on his website. gary@saretzky.com

Other Saretzky Presentations

Saretzky speaks regularly throughout New Jersey on 19th Century New Jersey photographers, often under the auspices of the Public Scholars Project of the New Jersey Council for the Humanities. He has lectures available on 19th century photographers for each of New Jersey's 21 counties and Newark, Trenton, and Princeton; 19th Century New Jersey Women Photographers; and New Jersey's Civil War Era Photographers. In these lectures, Saretzky explores the role of the local photographer in the era before amateur photography became widespread and the types of photographs they produced. He then presents biographical profiles of, and images by, selected photographers, including both portraits and outdoor views, with customized content for the locale of the lecture. In addition to his lectures on early New Jersey photographers, Saretzky's other lectures

include Margaret Bourke-White: Eyes on Russia; Elias Goldensky: Wizard of Photography; 12 Million Black Voices: Richard Wright and the Golden Age of Documentary Photography Books; Edwin and Louise Roskam: Documentary Photographers; The Blues Scene in the Delaware Valley (illustrated with his own photographs); and a dozen others listed on his website.

Outdoors

Step into Nature: A Beginner's Guide to Hiking -- Interested in hiking but don't know where to start? This program is for you. It will introduce you to the basics of hiking, e.g., what to wear, bring, local hiking locations, etc., and some sample starter hikes you might enjoy exploring. You can discover the beauty of nature at whatever pace you're comfortable with. With a little planning and the right equipment, it's an activity that almost anyone can do. Aside from the seasonal beauty of nature, many of the local hiking trails contain historical ruins, and in most cases, stories to go with them. Hikers old or new, non-hikers, and area historians will all find something of interest in this slide presentation. Mario Medici is a member of Adirondack Mountain Club (ADK) with over 30 years of hiking and hike leader experience.

Paranormal

Evidence from the Afterlife

What happens to us when our bodies die? Does our consciousness survive? If so, where does it go? Are there angels, beings from a non-physical realm, who guide us on this Earth? Are ghosts and angels more closely allied than we might think? What can they teach us? These questions and more will be addressed in this thought-provoking presentation and discussion that examines paranormal encounters with both "angels" and "ghosts" mixed with forensic evidence that supports the premise that we never really die. If you've ever wondered what's next for us after we complete our purposes in this physical life, this blending of the paranormal with the spiritual invites you to ponder the notion that death is nothing more or less than our graduation portal to a dazzling eternity. Ghosts I've Come to Know

Did you ever wonder what's on the other side? As a well-respected investigator of ghosts and hauntings for forty years and an author on the topic, Mr. Ward has developed a distinctive approach and body of evidence to support the belief in the survival of the human consciousness after death. This program includes new photos, audio recordings, developing theories, and information collected from his favorite, historic, investigation sites. This presentation will leave you with a fresh perspective on what happens us all after the transition we call death.

Ghosts: What They Are and How to Investigate Them

What's the real scoop is on ghosts? The answer is not found in gothic novels or Hollywood. The descriptions of what ghosts are and what they are not has come a long way. The word "ghost" is really an umbrella term that defines many types of paranormal phenomena. Survival of the human personality has become a popular topic and one that has mounting evidence to support its claims. Combining many years of involvement in the level-headed investigation of haunted locations with a unique, spiritual perspective on the topic, audio clips, and photographs, Gordon Ward will share his experiences and evidence, explain his views on ghosts, and teach attendees how to conduct their own, sound investigations without costly equipment.

"How to Hunt the Jersey Devil!"

This is Tony DiGerolamo, and I do a comedy/horror book series called The Pineys, about a family of hunters that hunts the kin of the Jersey Devil, and it's steeped in local flavor and folklore. I've been doing signings and talks around South Jersey about the Jersey Devil, South Jersey folklore, and my books. My books are here on Amazon:

https://www.amazon.com/dp/B082SCFW9R?binding=paperback&ref=dbs_dp_rwt_sb_pc_tpbk

Previously, I wrote for The Simpsons comic books, Politically Incorrect with Bill Maher and a variety of books, comics, and games over the years. If you have any questions, let me know. I hope we can arrange an event. The schedule for my book tour is here:

<http://www.thewebcomicfactory.com/signings-and-appearances/> Below is the write up I use for the talk. Join us for a discussion of the Jersey Devil and South Jersey folklore like no other! Witches, monsters, ghosts, and other supernatural characters abound in the Pine Barrens, so the Jersey Devil is not so alone! Learn about the fascinating history and tall tales of your community and practical steps to avoid being eaten by Mother Leeds' 13th child. Looking forward to speaking with you! Thanks. Presidents

Dead Presidents

My name is TJ Fallon. I am a local history buff who does presentations for local historical societies, libraries and uiversities. Let me explain a little about myself. Back in 2020 when the pandemic started, I was furloughed from my job. I took up this very crazy, wacky hobby of driving all over the United States **visiting the gravesites of every US President, Vice President, Declaration and US Constitution Signer**. I traveled to 33 states, over 50,000 miles driving. I now hold the Guinness Book of World Records for seeing these gravesites in the shortest amount of time. Just under 12 months. Since then, my (now 10-year-old) son Henry and I started a YouTube Channel and have a following now. Over 20,000 subscribers on YouTube and over 54,000 followers on Instagram. For the past 2 plus years, I have given speaking presentations to universities, libraries, historical societies, etc. I am currently writing a book about these adventures and my son is

a main focal point of the book. I would love to do a presentation for your historical society. I do not charge anything for my presentations. I already have 9 Presentations booked/scheduled for 2024. The presentations I do are as follows: **1- Presidential Gravesites 2- Vice Presidential Gravesites 3- Declaration of Independence and US Constitution Signers Gravesites 4- Brand new, MLB Baseball Hall of Fame Gravesites-** I have visited over 100 MLB Hall Of Fame Gravesites. So now I am doing a Presentation all about these and some very fun stories to go with it. Babe Ruth, Lou Gehrig, Satchel Paige, Ty Cobb, the list goes on and on. Very fun. 5- President and Vice President Campaign Losers- These are all people who ran for the office of President or VP and lost. Some of these are super, super obscure. 3rd and 4th Party type candidates. Some interesting stories though. **6- Articles Of Confederations Signers-** Same concept as the others, but this is focused strictly on the Articles of Confederation Signers. **7- Speaker of the House of Representatives-** Same concept, but all about the Speakers of the House and their Gravesite and stories. I am tentatively working on **New Jersey Governors** as well. I have visited a lot of their Gravesites. So, I may be doing a presentation on them in the future. If this is something your group may be interested in, please let me know asap. I would love to do it! Please feel free to view our sites and articles to verify my story above. www.youtube.com/deadhistory www.instagram.com/deadhistory1776 <https://www.app.com/story/news/history/2020/10/12/pandemic-hobby-finding-surprises-every-president-vp-grave/3620544001/> Thank you so very much for your time and consideration. Storytelling

"David Maccaffrey, the Shannachie of Glendunbunn Ballybegg: Spooky Tales" -- Did you know the Celts invented Halloween? Long before Christianity made it to Ireland's misty shores, the native Celtic people celebrated the 31st of October as the eve of Samhain, a time when the boundaries of our world and the 'Otherworld' are at their thinnest and all manner of spirits, spectres, fairies and fell creatures are free to roam the mortal realm. Join storyteller David MacCaffrey, the "Shannachie of Glendunbun Ballybegg" as he tells traditional and modern Irish tales of terror. Drawing on the ancient folkways and legends of the people who practically invented horror his stories present a macabre menagerie of ghosts and ghouls, devils and demons, banshees and beasties and things that go bump in the night. A perfect way to start our favorite haunted holiday.

Transportation

The Delaware and Raritan Canal” - Did you know that for more than 170 years, the Delaware and Raritan Canal has meandered across the narrow waist of New Jersey? Did you know that the D&R was one of our nation’s most successful towpath canals, carrying more tonnage in 1866 than the more famous Erie Canal? Did you know that Johnson & Johnson, Roebling, and Fleischmann’s Distillery all had their start along the D&R? And did you know that the canal provides the people of central New Jersey with both a water supply and a premier recreational facility? Canal author and historian Linda J. Barth will introduce you to the people, the bridges, the locks, and the aqueducts that made the canal work. This waterway, now the centerpiece of a popular state park, transported men and supplies between New York and Philadelphia during three wars. Inventor John Holland used the canal to deliver his *Holland VI* submarine to Washington for its Navy trials, and luxury yachts, like J.P. Morgan’s *Tarantula*, cruised the waterway. Come learn more about this gem of central New Jersey.

Crossing under the Hudson -- The Lincoln and Holland Tunnels are key links in the transportation infrastructure of New York and New Jersey. What comes to mind when we think of these tunnels? Traffic. Honk. Beep. Beep. Exhaust. Moving beyond that view, Gillespie takes a fresh look at their planning and construction. With a lively and entertaining approach, Gillespie explores these two monumental works of civil engineering and the public that embraced them. He describes and analyzes the building of the tunnels, introduces listeners to the people who worked there—then and now—and places the structures into a meaningful cultural context with the music, art, literature, and motion pictures that these tunnels, engineering marvels of their day, have inspired over the years. Angus Kress Gillespie, Ph.D. Professor of American Studies, Rutgers University.

Speaker requests that a microphone be made available. Program only available in Mercer, Middlesex, Monmouth, Somerset, and Union counties.

Carts to Cars

This informative talk will look at the transition from horse to mechanized power. For much of our history, horses were our partners in building our farms and cities. Tricia Haertlein asks and answers questions like: What was it like in the late 1800s and early 1900s as we switched from horsepower to horse-powered engines? What did horses do for us in the city and on the farm? Why did switching seem like a good idea? If engines were better, why were horses still delivering milk through World War II?

A resident of Hunterdon County since 1985, Tricia has worked for Janssen Pharmaceutical for over 20 years. She is a history buff and developed her talk for a local museum's transportation day and has been expanding it as her research reveals to cover more information. She is a member of local, regional, state and national horse and driving organizations and has served on the board of many of these groups. Currently, she is the president of both the Hunterdon County Horse & Pony Association and the Gladstone Equestrian Association. She also is a member of the NJ Horse Council, Carriage Association of America, and American Driving Society. For the ADS, she edited a book, Carriage Driving Games, a collection of games from around the country.

[Women in History and Suffrage Movement](#)

Bridge Builder in Petticoats: Emily Warren Roebling and the Brooklyn Bridge -- Many books and films have featured the Brooklyn Bridge and millions of people have crossed it. Built between 1869 and 1883, without modern machines or even electric light, it was the one of the most amazing technological achievements of its time. Yet few people know that a woman helped supervise much of its construction. After her husband became bedridden, Emily Roebling became his liaison to the project – eventually communicating with the engineers and suppliers so well that it was rumored that she had become the Chief Engineer herself! Later she helped design the family mansion in Trenton, studied law, organized relief for returning troops from the Spanish American War, attended the coronation of the Tsar of Russia and even took tea with Queen Victoria. At her death, she was called “the most famous woman in New Jersey” and “one of the most noted women in the country,” yet today almost no one knows her name!

Mrs. Bennett Follows the Army

Learn about life as a woman who followed Washington's Continental Army during the Revolutionary War. Wives, daughters, mothers, and single women followed their men on long marches and through cold and hungry conditions. Many had children with them. They worked as laundresses, cooks, and nurses. And, yes, a few were prostitutes.

Spend an hour with Mrs. Bennett and hear about life in camp, on the march, and during skirmishes and battles. Hear why they joined the Army, how they were treated, and why they stayed.

Performed in person only and in period dress.

Lillian Feickert, president of the NJ Woman Suffrage Association from 1912-1920, explores the overlooked role of New Jersey in the long frustrating fight for women's suffrage. Many do not realize that some NJ women once had the right to vote and then lost it for over a century. Feickert shares stories about how nationally known suffrage advocates Lucy Stone and Elizabeth Cady Stanton staged tax and voting protests in the state. She describes how Alice Paul became the dynamo who re-energized the push for a federal amendment and how Dr. Florence Spearing Randolph brought black women into the movement. Participants will learn that women were not "given" the vote but fought for it for generations.

"Marketing the Movement" -- This traveling exhibit, "Marketing the Movement," features six self-standing retractable banners that tell the story of how New Jersey suffragists employed emerging technologies and developed marketing tactics to bring visibility to the fight for women's suffrage. You can learn more about the traveling exhibit here: <https://www.alicepaul.org/marketing-the-movement/>; 856-231-1885

"Soldiers Without Guns: Women Defense Workers in WWII" -- The setting: It is 1943 and your organization is hosting a meeting to promote "war work" for women. Hear a testimonial from Rosie Niemiec (historical interpreter Stacy Flora Roth), a housewife who decided to do her bit for the war effort (and surprise her husband) by taking a job as a welder in a shipyard. This unique presentation features a character monologue, a display of period artifacts and ephemera, a discussion of women's participation on the homefront, and an invitation to the audience to share memories, memorabilia, and personal and family stories of the Second World War.

Mothers of Invention -- Carol Simon Levin portrays Lillian Moller Gilbreth, motion study pioneer and "Cheaper by the Dozen" mother of 12 and shares the stories of other overlooked women innovators, including many women of color.

From Margaret Knight (the 19th century "Female Edison") to Hollywood superstar Hedy Lamarr, these "Mothers of Invention" changed our lives, yet their accomplishments were all too often ignored, discounted or credited to others.

Also available as two shorter programs:

Mother of Invention (Lillian Gilbreth's story) and

Anonymous Was a Woman (a tour through centuries of overlooked female ingenuity)

1. *The Bedquilt*

Two stories welcome us to the time when quilts created community: “The Bedquilt,” by Dorothy Canfield Fisher (1906); “A Quilting Bee in Our Village,” by Mary E. Wilkins Freeman (1898)

Old Aunt Mehetabel is taken for granted by her New England family—until she conceives a quilt “beyond which no patchwork pattern could go.” This suspenseful tale achingly reveals Mehetabel’s journey to self-respect, universal admiration, and the realization of her ideal.

Mary E. Wilkins Freeman’s gleeful “A Quilting Bee in Our Village” begins the program. In conclusion, Canfield Fisher’s memoir describes her inspiration.

2. *Gettysburg: One Woman's War*

Three selections from Elsie Singmaster’s 1913 classic *Gettysburg: Stories of the Red Harvest and the Aftermath*—“July the First,” “The Battleground,” “Mary Bowman.”

In Singmaster’s powerful and specific exploration of a Civil War icon’s physical and emotional terrain, fictional towns-woman Mary Bowman lives the war and its legacy—from the first shots at Willoughby Run to the consolation of Lincoln’s Gettysburg Address, to the country’s healing a half century on.

3. *Women Breaking Loose*

A century ago, these stories tackled dilemmas women still face daily: Who comes first—my family or me? Where do I belong—at home or at work?”

The heroines in Kate Chopin’s poignant “A Pair of Silk Stockings” (1897) and Edna Ferber’s comic “Representing T. A. Buck” (1913) follow paths still traveled by women: home and career. In each story, the expectations of the time, the society, and circumstance determine her journey—whether she desires it or not.

4. *The Revolt of “Mother”*

Equal rights hit the farm, with a twist O. Henry would envy.

Forty years ago, Adoniram Penn promised his new bride that he would build the proper house she deserved on their New England farm. Now, as their eldest prepares for her wedding, the family still crams into the old, shabby cottage . . . and Father is building a barn where the new house should go. It’s the last straw for Mother, and she has an idea. By NJ’s Mary E. Wilkins Freeman (1891).

5. *A Bird in the Hand*

With insight and humor, Sarah Orne Jewett and Mary E. Wilkins Freeman wrote scores of stories about the small-town and country people they knew and observed so well.

In Wilkins Freeman’s “The Parrot” (1900), a disillusioned spinster is avenged by her feathered friend.

In Jewett’s “Miss Esther’s Guest” (1896) an unasked-for summer visitor proves surprisingly welcome.

6. *How the Other Half . . .*

Two stories of surprise.

In O. Henry's 1907: "Transients in Arcadia," the mysteriously elegant Madame Beaumont checks into an exclusive Manhattan summer hotel. The worldly Harold Farrington arrives soon after. There follows . . . the twist.

Two couples collide in Mary E. Wilkins Freeman's 1903 "The Apple Tree": The elder drudges compulsively, while the indigent younger relishes the beauties of nature. When the old lady demands the young man's help with spring cleaning . . .

7. Gettysburg: One Woman's War -- With townswoman Mary Bowman, we travel the emotional and physical terrain of 50 years: from the cannons' first roar to the grief and devastation that follow; from the promise of Lincoln's visit and commemoration, to the healing only time can bring. The three selections are from Elsie Singmaster's 1913 *Gettysburg: Stories of the Red Harvest and the Aftermath*, published on the centennial of the battle that changed the course of our Civil War.

Someone Must Wash the Dishes, An Anti-Suffrage Satire - "Ladies, get what you want. Pound pillows. Make a scene. Make home a hell on earth—but do it in a womanly way! That is so much more dignified and refined than walking up to a ballot box and dropping in a piece of paper!"

US Women's Suffrage Movement -- Lecture focusing on the development of the suffrage movement in the US that resulted in the 19th amendment to the US Constitution in 1919 permitting women to vote. Profiles of the key players and organizations in the development of the movement will be included. A timeline of events from the movement's origination in the abolitionist movement to the passage of the amendment and the first vote in 1920 will be presented.

Nobody Owns the Sky: Fascinating Stories of Forgotten Female Aviators -- Long before Amelia Earhart's famous exploits, female flyers had already proved that aviatrices were every bit as brave and daring as their male counterparts. Flying in flimsy wood and canvas aeroplanes, Raymonde de Laroche, Hélène Dutrieu, Marie Marvingt, Harriet Quimby, Katherine Stinson, Ruth Law, Bessie Coleman and Elinor Smith awed and thrilled people on the ground — executing audacious acrobatic aerial maneuvers, soloing across the English Channel, setting records, barnstorming and buzzing beneath New York's bridges. Undaunted by male skepticism, they were determined to show that anything that men could do, they could do better!

A W.A.S.P. Takes Wing: The Women Airforce Service Pilots of World War II -- During World War II, more than one thousand women volunteers completed the WASP military pilot training program. They endured terrible Texas weather, snakes, spiders and scorpions, as well as the hostility of some male instructors. Graduating WASPs piloted every kind of military aircraft, tested new and overhauled airplanes (some with defective parts or dangerous reputations), delivered more than 12,000 planes, and flew over 60,000,000 miles (sometimes towing targets that soldiers shot at with live ammunition!) Thirty-eight of them died serving their country. Then they were told that men needed their jobs, and they were dismissed and forgotten.

Carol Simon Levin tells the story of the amazing WASPs through the eyes of Ann Baumgartner Carl, the Jersey girl who trained as a WASP, became the only American woman to test-fly experimental planes during the war, and the first woman in the world to fly a jet airplane!

“The Evolving Social Status and Legal Rights of Women during New Jersey’s 350 Years.”

During the 17th and 18th centuries most women worked at home raising children and performed their domestic duties, if she lived on a farm then she shared in farm work in addition to domestic duties. The roles in the home were sharply defined between the husband and wife. Upon marriage a wife forfeited all property to the husband, if she earned wages; these too belonged to the husband. Fathers had the custody of the children. A wife could not enter a contract or buy or sell property. And then there were the cruel penalties of adultery with fines and whippings. The talk will continue through the contributions of women in the home wars of the American Revolution and Civil War and then through women in the workplace and with discussion of today’s business leaders and women in the professions. And, of course, the fight for the right for women to vote and suffrage movement. The audience will participate in the discussion when they relate the changes that have occurred and have affected them during their lifetimes.

TALES WELL TOLD, by writers of America’s Gilded Age, are vibrant living-history lessons. They connect us with our past through compelling characters whose dilemmas and insights, passion and humor, are, after all, our own. Presenter **Michèle LaRue**’s commentary explains that past and further illuminates our commonalities. Among her offerings:

Someone Must Wash the Dishes: This satiric monologue was written by pro-suffragist **Marie Jenney Howe** and published by the NAWSA in 1913. In the early 1900s, many women fought against Suffrage, but none with more charm, prettier clothes—and less logic—than Howe’s fictional speaker, who employs every argument in the Antis’ arsenal, to maintain the status quo. LaRue’s post-performance lecture describes the perceived realities of the time, to explain the Antis’ contradictory, seemingly irrational and ignorant arguments.

Gettysburg: One Woman’s War: Three stories from **Elsie Singmaster**’s classic *Gettysburg: Stories of the Red Harvest and the Aftermath* compellingly explore the physical and emotional terrain of the battle and ground that became national icons. With townswoman Mary Bowman, we live the war and its legacy—from the cannons’ first roar to its echoes a half century on. Published in 1913, on the eve of another fateful cataclysm: World War I.

The Bedquilt: Old Aunt Mehetabel is taken for granted by her New England family—until she conceives a quilt “beyond which no pattern could go.” This suspenseful tale was written by **Dorothy Canfield Fisher**, in 1906. It starkly and poignantly reveals a spinster’s journey to self-respect, universal admiration, and the realization of her ideal. Introduced by **Mary E. Wilkins Freeman**’s sprightly “A Quilting Bee in Our Village” and concluded by excerpts from Canfield Fisher’s memoir.

Eve's Diary: **Mark Twain** often wrote of the Garden of Eden, imagining the very first couple's exploration of Earth from the changing perspectives of his own maturation. This witty and poignant theatre piece ingeniously incorporates several Twain stories and essays—setting them “a long time ago, in Heaven.” Dramatized by NJ actress-playwright **Gayle Stahlhuth**.

Women Breaking Loose: A century ago, **Kate Chopin's** “A Pair of Silk Stockings” (1894) and **Edna Ferber's** “Representing T. A. Buck” (1913) tackled two dilemmas women still face daily: Who comes first—my family or me? Where do I belong—at home or at work?”

Other authors—famous or undeservedly forgotten—in LaRue's repertoire include **Alice Brown, H. C. Bunner, Bret Harte, O. Henry, Sarah Orne Jewett, Edith Wharton, and Edith Wyatt**.

Michèle LaRue is a professional actress and history enthusiast who tours nationally with a repertoire of 30 performances from America's Gilded Age. Recommendations and reviews on request. Visit <http://michelelarue.com>, call 201-863-6436, or write ruedelarue@aol.com.
